LASER 2000

Built to race, fun to cruise

A boat born for club racing with a dynamic but forgiving hull shape that is easy to control, making it perfect for a family cruise as well. It is ideal for less experienced sailors with years of built in progression included.

The ride is smooth, the sailing position is perfect and the confidence factor is high. It's a chameleon that has different moods to suit the occasion. Its handling and performance will impress the enthusiast and tempt them into the race track, with an easy to use gennaker and adjustable kicker and cunningham allowing fine tuning on the water. Yet it has the temperament and versatility to allow you to take it easy; you can load up with family and equipment for a day out with the easy to reef mainsail, furling jib and storage bins. Newcomers and youngsters can be taught aboard easily and you can sail single-handed too.

HULL AND SAIL COLOR OPTIONS

Blue waterline hull as standard—no color options

CONSTRUCTION

Glass re-enforced plastic (GRP or fibreglass) foam sandwich. This provides a light weight stiff and responsive hull. Still robust and low maintenance, easy to repair should you damage it.
